Magazine Gates

Access Platforms

PUMP ROTOR REMOVER

- Equipment developed in partnership with BHP
- Engineered to safely remove pump rotors from stator housing (up to 5T pull force)
- Remotely operated, putting distance between personnel & equipment
- Fully guarded pinch points
- Rated lifting points & lockable HD castor wheels

STRETCHER RETRIEVAL SYSTEM

- For safe rescue of injured personnel through your escapeways up to 50m in depth
- Rapid assembly in emergency
- Includes automatic fall arrest
- Safe storage in light weight case

STEEL BROW SET

- Defines stope brow for safer draw down management
- Reduces risks to personnel and assets
- Provides control of
 - Rill angle
 - Bund placement
 - Worker barrier placement

GROUND ENGAGING TOOLS

- Heavy duty bucket teeth and adaptors
- High quality engineering, durable
- Protects bucket
- Available for a variety of machines
